Coulomb Technologies' web-based ChargePoint® Network Application Services make it easy to manage and maintain ChargePoint® Networked Charging Stations for every business need. The ChargePoint Network Station Manager provides charging station owners centralized management of pricing, access control, advertising, and usage data for their ChargePoint Networked charging stations.

Display details for any station

View all your stations at a glance on an easy-to-read Google™ map. Filter the map to display only stations with a particular status, only a specific type(s) of station, and more.

Click any station on the map to display its real-time status information. Display the station's usage summary and view details about each charging session. View how the station has been set up, and whether or not the station is visible to drivers.

Establish pricing

Choose whether drivers access your charging stations for free, or for a fee. The Station Manager allows you to set pricing for preferred groups of drivers and on a per time basis (similar to a parking meter). You can offer free "park and charge" services during business hours, fee-based parking outside of business hours, or fees that vary any time for preferred customers, individuals or groups.

Define Pricing Specification

Add New Edit View

Select	Host Name	Pricing Specification Name	Pricing Group	Pricing Version
<input checked="" type="radio"/>	Coulomb Tech	Mini-e-station card	all other,Exempting mini's card	2

Edit Pricing Specification

* Host Name: Coulomb Tech

* Pricing Specification Name: My Station Pricing

Description: My Fleet Vehicles charge for free, but the General Public pays \$4/plug-in.

1. Select Group to receive preferred pricing (optional): Everyone Else [?]

2. Select Time of Day Variation (optional): all day [?]

3. Select Pricing Method and amounts (required): per session [?]

4. Add to Pricing List: Add

* Session \$ 4.00 / 24 Hours

Pricing Rules

Group	Type	Start Time	End Time	Session (\$)	Min (\$)	Max (\$)	/ Max Time (hours)	Action
Everyone Else	per session	-	-	4.00	-	-	24.00	
My Fleet Vehicles	per session	-	-	Free	-	-	24.00	

Fields marked with * are required.

Automatically process payment

With the ChargePoint Network Flex Billing Service, ChargePass™ and credit cards are processed immediately, and funds are automatically transferred from a driver's account to the charging station owner's account. Transaction data can be centrally monitored and can be exported to other accounting systems to track return on investment.

Control charging station access

Control costs, eliminate electricity theft, and enhance safety by defining how your charging stations are accessed. Decide if your charging stations are available for public or private use. Customize ChargePass cards' private access options to restrict charging station use to individuals or groups, and configure access options to vary by time of day.

Customize advertising

Advertise your brand and build driver loyalty using the ChargePoint Networked Charging Stations' scrolling banner display. Customize the display to greet drivers, or to announce special incentives, in multiple languages.

Track charging station usage and inventory

Measure green initiative success and manage your return on investment with station usage data. The Station Manager displays usage, energy consumed, station availability, and greenhouse gas (GHG) trends for each charging station. Data can be exported and combined with data from other systems to track costs, calculate savings, and monitor efficiencies of the electric vehicle charging system.

Know the exact details of your charging station inventory at all times. The Station Manager displays name, MAC address, serial number, warranty number, model number, and location for each charging station. Data can be exported and combined with data from other systems to effectively track assets and costs.

FEATURE LIST

Feature	Description
Group-Specific Pricing	Configure one price for everyone, or choose to exempt certain users from usage fees (for example, your fleet vehicles and your employees), or provide discounts (such as loyalty discounts) for certain users.
Time-Specific Pricing	Configure one price for all times, or vary pricing depending on the time of day.
Funds Transfer	Station users are automatically billed. Funds are transferred monthly to the station owner's account.
Access control	Configure access policies for one or more stations.
Advertisement control	Configure advertisements to scroll on the stations' displays.
Usage reports	View graphical or tabular usage reports, with CSV export, for all stations or individual stations. Filter the report to include only desired dates and stations.
Inventory reports	View tabular inventory reports (serial number, model, warranty certificate), with CSV export. Filter the report to include only desired dates and stations.
Real-time station location and status	View station locations on map, showing their real-time occupancy status.

About Coulomb Technologies

Coulomb Technologies provides the most advanced, easy to use electric vehicle charging infrastructure for municipalities, businesses and utilities - the ChargePoint Network. Electric Vehicle (EV) charging is delivered via ChargePoint Networked Charging Stations which cover the entire range of Level I, Level II, and DC Fast electric vehicle charging needs. The ChargePoint Network provides station owners a centralized view of the charging stations anywhere there is Internet connectivity. Web-based ChargePoint Network Software Application Services make it easy to provision, manage and maintain ChargePoint Networked Charging Stations for every business need.
