

Scalable and flexible high power DC charging solution from Australia

Verdek's Veefil-PK* product line from Tritium is ideally suited to traditional fuel stations, motorway rest stops, and convenience stores.

The Veefil-PK 350kW high power charging system can add 350km of range to an electric vehicle in 10 minutes, and can adapt power management behavior according to the changing needs of your customer base.

- Up to 350kW power output with voltage of 920Vdc
- CHadeMO and CCS compatible
- Effortless charging
- OCPP Integration
- High energy efficiency
- 24/7 multi-channel global support network
- Operating temperature is -35° C to +50° C for outdoor applications

Liquid Cooling

The Veefil-PK is liquid cooled which controls heat and reduces wear on internal components.

Online Helpdesk

Tritium's myTritium online portal allows you to log service requests, manage assets, and access community resources

Show Off Your Brand

The customisable front decals and HMI screen of the Veefil-PK offer an impactful branding opportunity.
