**COULOMB'S CHARGEPOINT™, THE ONLY NETWORKED EV  
CHARGING STATION, TO BE DISPLAYED AT SEMA BOOTH #30215**

LAS VEGAS, Oct. 29, 2009 – Guy Mannino, president and CEO of **Verdek** and **Verdek-EV**, will display a ChargePoint™ Networked Charging Station in the Green Zone (Upper South Hall #30215) at the 2009 SEMA Convention in Las Vegas next Tuesday-Friday, Nov. 3-6. In addition, SEMA will host a *Driving Green* press conference in the booth from 1:00-1:15 p.m. on Tuesday.

California-based Coulomb Technologies has developed smart charging stations for municipalities, utilities, green office buildings and parking garages allowing consumers to charge their electric vehicles wherever they sleep, work and shop. Much like a parking meter, a charging station can be located on almost any street, in office and shopping mall parking lots, as well as apartment complexes. Verdek-EV is an exclusive regional distributor of Coulomb ChargePoint™ and Mannino will be available in the Green Zone on Tuesday and Wednesday to provide more information regarding this key component of *Driving Green*.

For media interviews, please contact me ([Jack@Gerken.org](mailto:Jack@Gerken.org)) and for more information about **Verdek EV** and Coulomb products, please visit the web site at [www.Verdek-EV.com](http://www.Verdek-EV.com).
