CT500 Launch

With the introduction of the CT500, we can now offer a full product range of charging stations for all your requirements. [Read more](#)

Great week for Coulomb and its ChargePoint® Network!

Time Magazine and BusinessWeek have recognized ChargePoint® Network for electric vehicle charging as one of the top innovations of 2010. Time Magazine names the ChargePoint charging station one of the [50 best inventions of 2010](#).

BusinessWeek names Coulomb as one of the top [20 Small Businesses of the Future](#)

Coulomb is the recipient of three new patents for EV charging station design. This is another important step confirming Coulomb's product innovation and market leadership

Download the "ChargePoint" Apps for iPhone and Blackberry

With close to 1,000 stations installed in the US, this nifty application will make it easy to find the nearest charging station. The app will tell you if the charging station is available or in use. Once at a station, the app also lets you start, stop, and monitor a charging session.

Unique installations

There is no limit to locations where we can install a ChargePoint charging station; we will give you examples in the next Verdek Newsletters to prove it.

One such example is Wooden Cross Lutheran Church in Woodinville, WA which will be the first church in the country to have its own EV charging station. It's the first church to benefit from a \$37 million DOE/Coulomb program to install [4,600 public and home charging stations](#) around the country.

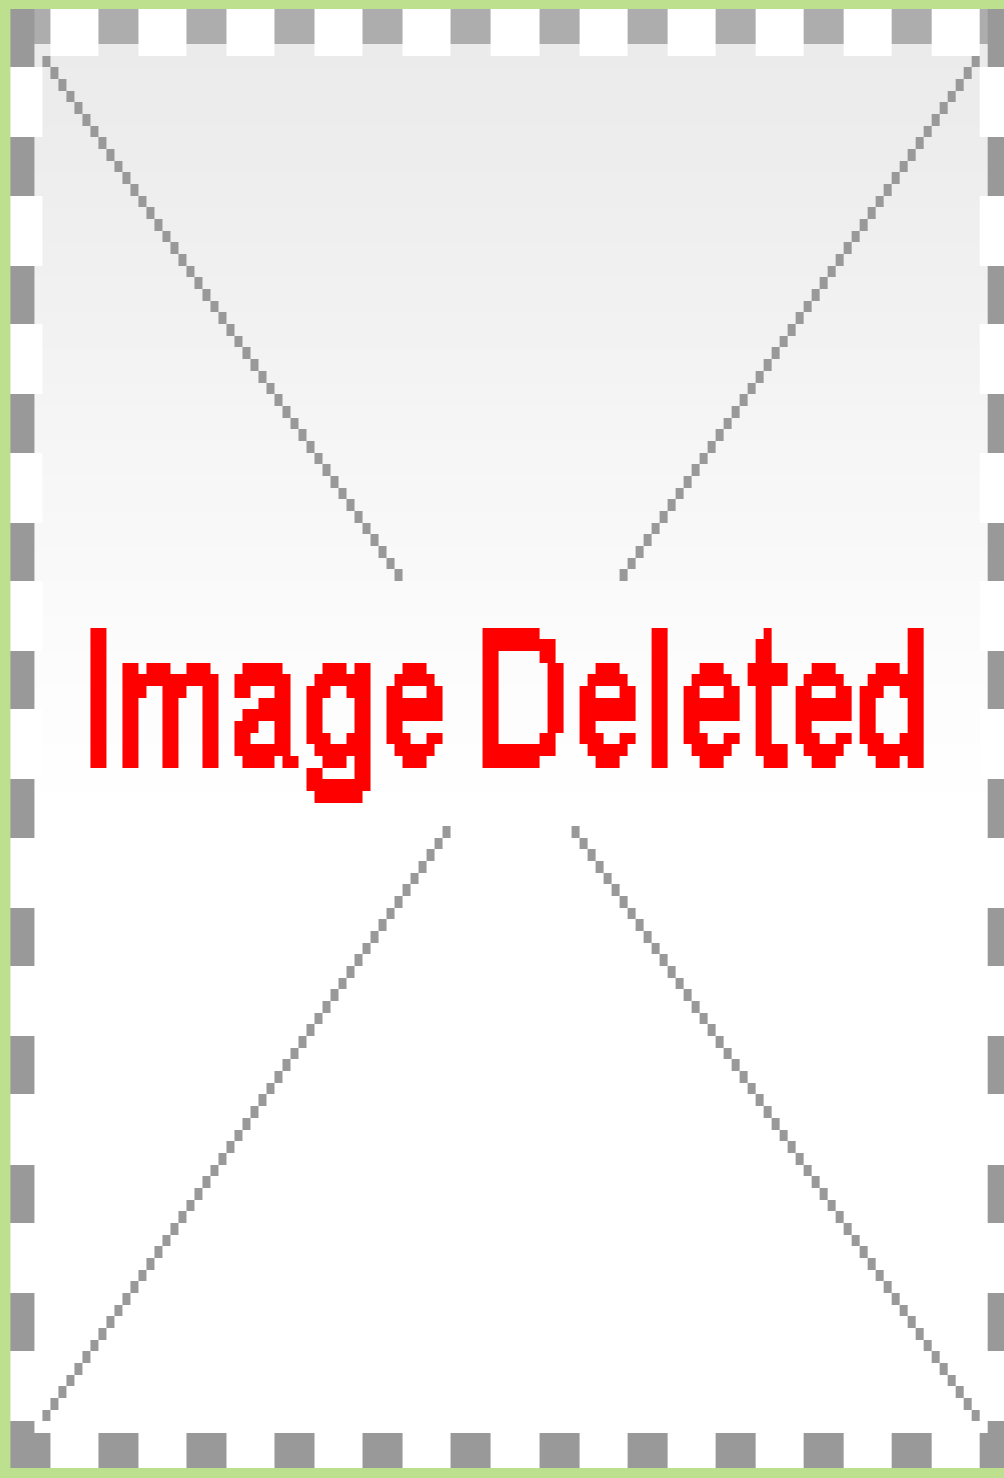

Those few hours you spend in church would be enough to top up your battery before heading off for family activities, which might include a trip to the mall where you can top-up some more while you shop.

ChargePoint At GM's RenCen

ChargePoint CT503

The Residential Solution is Ready for Delivery

ChargePoint CT503

The CT503 ChargePoint charging station is a 7.2 kW single output station designed for single and multi-family homes, apartments and condominium buildings, light commercial and fleet applications for the North American marketplace. The station delivers Level II (208/240 V @ 30 A) charging and is compatible with plug-in electric vehicles that comply with the SAE J1772™ plug-in electric vehicle charging standard. The station's small size and flexible interfaces for utility Automatic Meter Infrastructure (AMI) make it an ideal solution for homeowners, utilities, fleet managers, and property managers.

To eliminate energy theft and to enhance safety, a card reader option is available for drivers to access and energize the station with a ChargePass™ card. The highly visible display guides drivers with instructive messages and can be used to display custom advertisement or greetings for drivers.

This December, Nissan and GM will start delivering their first EVs. We will finally see the Leaf and the Volt in many major US markets. Many more car manufacturers are getting ready. Ford just released the map of the target markets for its Focus Electric: Atlanta, Austin and Houston, Texas; Boston, Chicago, Denver, Detroit, Los Angeles, San Francisco, San Diego, New York, Orlando, Fla., Phoenix and Tucson, Ariz.; Portland, Ore.; Raleigh Durham, N.C.; Richmond, Va., Seattle, and Washington, D.C. The EV-Evolution has begun. Get ready, contact Verdek for the most efficient EV charging solution.

Sincerely,

Guy Mannino
