SAE approves new fast-charging standard for EVs, plug-ins

SAE International said it has approved a new technical standard that will dramatically reduce charging times for plug-in hybrid electric vehicles and electric vehicles. The global engineering group said the new charging standard, developed with the cooperation of more than 190 automakers, utilities and equipment builders, will allow charging times to be reduced from as long as eight hours to as short as 20 minutes.

Monthly EV sales continue to grow

It's that time again - September sales figures are in. Overall EV sales are up, and the standings remain the

Fisker delays Atlantic production start to 2014-2015

Fisker Automotive will start production of the Atlantic in late 2014 or 2015, according to a Reuters report. That's two years later than the planned production start of the midsize gasoline-electric sedan. [Read on . . .](#)

Jay Leno's Garage: Proterra Ecoliner Electric Bus

Will this vehicle revolutionize mass transit? It incorporates elements of Formula 1, naval and tank technology, but the most important thing about this bus is the rapid charger on its roof, which means it can run 24 hours a day, seven days a week!
