

BREAKING NEWS - March 6th, 2019

Join the Verdek Certified EV Charging Station Installer Network with a few Simple Steps!

The Electric Vehicle and EV Charging Station markets are expanding at a rapid pace and are on a trajectory to develop into a **\$1 billion dollar plus market** creating vast opportunities for "qualified" installation contractors. For the last 10 years Verdek has become one of the largest EV Charging Station equipment providers installing thousands of stations throughout the U.S..

Developers and building owners now recognize that EV Charging is no longer an option, but instead is a must be included amenity!

"EV charging stations are now in high demand due to the fact that every vehicle manufacturer in the world is not offering and selling higher numbers of electric vehicles than ever before" commented Rudy Garcia, Verdek LLC Vice President of Sales & Marketing.

Verdek has an extensive amount of experience with all the station models and types currently available in the market today, and continues to be a leader in this new technology. Verdek is known nationwide as a reliable and responsive provider of seamless turn-key solutions, assisting with site selection, station options and requirements, installation project planning and management, as well as all on-going support and assistance that are needed to achieve and maintain a worry-free charging station experience long-term.

We have recently created an updated EV Charging Station Installer's Guide for all our existing contractors and are looking to certify additional installers in order to meet the growing market demand.

Whether you're an existing Verdek contractor/partner or not just click on the link below indicating your interest in being part of our EV Charging Station Installer Network.
