Verdek installs 7 ChargePoint stations at PHL

- EV drivers are now able to charge their vehicles when using the public parking facilities at Philadelphia International Airport (PHL).

- There are 7 ChargePoint dual chargers located at Concourse C, Concourse D and Economy Lot. EV drivers can access to the

exact location via the ChargePoint App. The PPA will allow free charging at these locations until April 1, 2016. The normal parking rates will be charged to park in the public parking facilities at PHL. Visit www.airport@philapark.org/airport for more information on airport parking rates. Verdek managed the installation of the stations.

Tesla Model E, Chevy Bolt, 200+ Miles Now

Available

We are getting closer to having EVs with a range of 200 miles and a price close to \$30,000. This is the level of performance and price that will open the EV market to the broad market. GM will be starting the

production of the Chevy Bolt later this year, Tesla just announced that it will reveal the long waited Model E in March and it will be in production 2017. EVs will soon enter the mass market

Over 400,000 bookings on MODEL 3
EVs move from niche to mass market.
