Seth Mannino (7/24/1990 - 3/28/2015)

Over the past 4 years you have received many Verdek Newsletters signed by Seth Mannino. Seth was Verdek's Marketing Manager. Seth was diagnosed with a rare form of cancer one year ago. He fought stoically to the end, but tragically lost the battle on March 28, 2015 at the young age of 24. Seth was Verdek's first employee and more importantly my son.

We will forever miss him.

Guy Mannino

The New York International Auto Show

NYIAS is back. April 1 and 2 were press days. This year we noticed the intense battle for new active safety features. Among the most innovative, GM introduced Active Safety for teenage drivers. The new feature forces its drivers and passengers to put their seat belt on to activate the entertainment center. Many car manufacturers have added sensors for pedestrians, cars passing from the right and left, automatic braking or managing breaking in icy

conditions. As usual there were major new model launches such as the new Chevy Impala or the new Smart City Car among all. Based on our company mission, we visited all stands to see the latest on alternative fuel solutions. The European car manufacturers feature a large number of turbo diesel solutions even in the luxury segment such as the new Range Rover Sport with a 3.0L turbo diesel engine. There were no signs of any vehicles using CNG. Honda shows a fuel cell car. Most car makers brought EVs, Hybrids and Plug-In EVs. Below is a selection of the most interesting models.

The New Chevy Volt

BMW i3

BMW i8

Audi A3 e-tron

Ford Focus E - I wonder why Ford has not added a DC fast charger to this car yet.

The New e-Golf

The New Nissan Leaf

And now some alternative vehicles. Honda has the only fuel cell car. It has an impressive design.

Honda FCV

Last but not least, some interesting pictures from other stands that did not have any alternative vehicles but in any case some cool cars. Check Alfa Romeo stand for a 1965 Coupe and a 1928 open wheel.

and finally... the Volvo stand did not have any alternative fuel vehicles but.....they had great cappuccinos for refueling customers.

Verdek is committed to promote alternative fuel infrastructure for EVs and CNG vehicles. Contact us for any of your future projects. Our team will be glad to advise you on the best solution.

Sincerely,

The Verdek Team
In memory of Seth Mannino

This is the fine print text where you might tell your customers how the item will be shipped and, for example, if they are overseas that there will be additional shipping charges and must contact you.

Verdek, 123 Rolling Meadow Rd, Madison, CT 06443
