“Galileo’s New Leading Edge LNG Fueling Technology the Cryobox® LNG Nano Station will Fuel the World’s First Environmentally Clean and High Speed Passenger RO-RO Ship”

Buenos Aires, 2nd May, 2013 - Seven Cryobox® LNG Nano Stations, designed and manufactured by Galileo, will fuel the tanks of the 'López Mena', the world's first high speed passenger RO-RO ship powered by Gas Turbines fed on LNG, which will daily cross the River Plate between Argentina and Uruguay.

“This is a huge step in a new era of eco-sustainable heavy duty transportation. The integration of our new Cryobox® LNG Galileo technology in will demonstrate that LNG is the most suitable and cleanest power alternative for long-haul trucks; delivery fleets; buses; ships, barges and ferries; and railroad locomotives, when long distances should be covered, even when the odds of refueling are widely scattered. Since LNG has superior energetic density over any other diesel substitute, it is possible to charge more fuel to cover longer distances in the same tank,” said Osvaldo del Campo, CEO of Galileo.

“Galileo’s Cryobox, as the latest fueling technology breakthrough from Galileo joins a long list and solid history of CNG and now LNG fueling solutions that has been successfully deployed by Galileo throughout the world for a number of decades,” commented Guy Mannino, President/CEO of Verdek LLC a U.S. Distributor of the Galileo product line. “All the Galileo solutions that we have been introducing to many industry stakeholders, investors and service providers throughout the U.S., has consistently been received with a very high level of interest due to the sophistication of Galileo’s design and engineering. This latest LNG solution is truly a game-changer and will even more rapidly accelerate Galileo’s entry into the U.S. market.”

About the Galileo:

Since 1983 **GALILEO** has been a world supplier, state-of-the-art natural gas technology leader, and the only Argentine company to offer an entire range of equipment for CNG. Today, Galileo is the leading company in natural gas applied technology providing vehicle conversion, compression, and natural gas transport equipment. Galileo has an international network of business associates, distributors and representatives in Latin America, Europe, Asia and now the United States.

About Verdek LLC:

VERDEK LLC provides clean fueling solutions for fleets, municipalities, retailers, and building owners. Products include charging stations for electric vehicles and CNG fueling stations. Verdek’s sales and support team members are experts in both alternative fuel options and provide products that are world class in their technology and that are also ranked number one in each industry. Both fuel sources are cleaner and reduce our dependency on foreign sources of oil. CNG has become abundant in the US and electricity production is continuously shifting toward cleaner production methods such solar and wind making both fuels a very attractive and clean option for fleet owners/operators and consumers.
